

**Doing electrical work, but you just aren't quite sure of yourself?** Pick up a copy of our Basic Automotive Electricity Book. This fact filled book walks you through electricity from the basics to a complete automotive circuit diagram. And at just \$7.95 it's better than aspirin at solving electrical headaches!

## **Cable Installation Kit with Cable Housing**

**#B20C**

Use with bear claw style latches for inside latch release

Kit Includes:

- 6 foot of cable with connectors
- end connectors, housing clips and hardware
- installation instruction

Manufactured by Watson's StreetWorks Rod & Custom Products

Thank you for buying a StreetWorks product. Be confident that it will provide the quality and performance that you demand for your car. *Please read and understand all installation instructions before beginning.* Planning and preparation will make the entire process easy and quick.

1. Determine the location that you want for the inside latch release. One 6" long piece of cable/sheathing has been provided so that you can cut the length you need but note that the lever assembly and latch need to be within about 36" maximum of each other. Leave enough room at each end of the sheathing for the cable to loop and be connected with the compression sleeve (lever assembly end) and adjustable connector (latch end). measure twice, cut once. Be sure to deburr the sheathing end so as to prevent cable fraying.
2. Route and attach the cable sheathing using the nylon clips, screws and nuts provided. At the lever assembly end, the cable can be attached to either of the rear arms, whichever is most convenient.
3. To install the cable, loop one end through the appropriate hole on one lever assembly arm and permanently attach using one of the compression sleeves provided (sometimes called barrel crimps)

Watson's StreetWorks has an extensive line of street rod and custom car and truck parts with one of the largest selections of billet interior trim and electrical accessories.
