

Thank you for buying a StreetWorks product. Be confident that it will provide the quality and performance that you demand for your car. **Please read and understand all installation instructions before beginning.** Planning and preparation will make the entire process easy and quick.

The "MagnaKey" for added security #32053

Add security to your Hot Dot Push button start. Our new "MagnaKey" will put a stop to anyone trying to drive off with your ride. Mount it in plain sight on the dash or hide it away from curious eyes. Without the MagnaKey your Hot Dot button is locked in position. Receptacle mounts in a 3/4" hole, Bezel is 7/8". Requires 3" of clearance behind the mounting surface. 2 keys included

**Operation:** With the MagnaKey removed the Hot Dot unit is locked in its current state. With the car running you can either remove the key or leave it in place. Then re-insert it to turn off the car.

**NOTE: Do Not Use To directly control the run circuit of you vehicle.**

**NOTE 2: Switch is rated at 3 amps. Other circuits may need a relay.**
