

Thank you for buying a StreetWorks product. Be confident that it will provide the quality and performance that you demand for your car.

## Classic Button Style Brake Switch

#33021

- Fits most vehicles with swing pedals
- Adjustable Design
- Moisture-resistant plastic body and plunger
- (2) .250 Connectors

1. **Determine the best location** for mounting the (33021) Brake Light Switch. Most vehicles with swing pedals will have appropriate bracket in place under the dash. The brake lights are **"OFF" when the plunger on switch is depressed**. (Figure A.)
2. **When applying the brakes** the brake pedal arm is pressed further away from the switch, allowing the Brake Light Switch plunger to travel to its at "REST" position, brake lights are "ON". (Figure B.)
3. **Switch mounts in a ½" hole in your bracket (NOT PROVIDED)**
4. **Wire the switch** to the existing brake switch wire leads with provided connectors.
5. **Reconnect main power** and test the switch operation.
