## Turn Signal Lever (GM) with MOMENTARY Switch and 40 amp Relay

#L43MR

Tilt Lever with S/S arm & aluminum knob to fit GM 1/4-28 threads has a MOMENTARY switch hidden in the nob. Use for momentary switching applications or as a replacement for "grounding contact only" switches if you have problems grounding to the steering column (40 Amps max.). Great as a horn switch!

To install the turn signal lever simply screw it in place into the same hole that the original factory turn lever occupied using the screw provided. After installing the lever, carefully fish the lead wires down through the column and wire.

### Positive Switching
