Thank you for buying a StreetWorks product. Be confident that it will provide the quality and performance that you demand for your car. *Please read and understand all installation instructions before beginning.* Planning and preparation will make the entire process easy and quick. **DISCONNECT POWER AT THE BATTERY BEFORE DOING ANY WIRING!**

1. SWITCH MOUNTING: Determine a good location for the push button switch and mount by drilling a 1/2" diameter hole and secure with the hardware included. Wire the switch per one of the wiring diagrams shown. If the back side of the switch (solder joints) will also be in a wet environment, coat both solder connections with RTV or other non-conductive sealer. DO NOT exceed the 5 amp maximum for momentary use only.

NOTE: A relay **IS** required if the amperage draw of the load is equal to or greater than 5 amps.

2. RECONNECT main power and test your connections.
